

Equipments

standard 2 types of mouldboards are available, but in option is it possible to equip your plough with slatted mouldboards. Also to reduce the running cost of your Prima plough, all the bodies are delivered in standard with a reversible point with 3 holes which will make possible to increase the long life of your point. You will find such technology also on the landside, to offer you the best output on your investment.

For a perfect ploughing quality, Prima is fitted standard with skimmers or trashboards. In option some other models can be available.

Your Prima plough is equipped in standard with a rubber wheel 600x9, to offer a perfect depth control during the ploughing. Also to reduce the effort on the tractor lift Prima is using a new wheel support, which makes possible to ensure a gently turning operation. Again our priority is to offer you the best of Grégoire Besson expertise for an attractive price/quality level.

A simple design for optimum efficiency

The robust chassis of the Prima range has for origin the expertise of the group gregoire besson. It ensures a high level of reliability comparable to other products of the group.

Designed to the tractor from 70 up to 120 hp, this plough is manufactured with a short frame, limiting the efforts on the tractor lift

To keep the mechanical qualities of the steel intact, some bushes are welded after drilling the tube.

Hitch: simplicity and efficiency

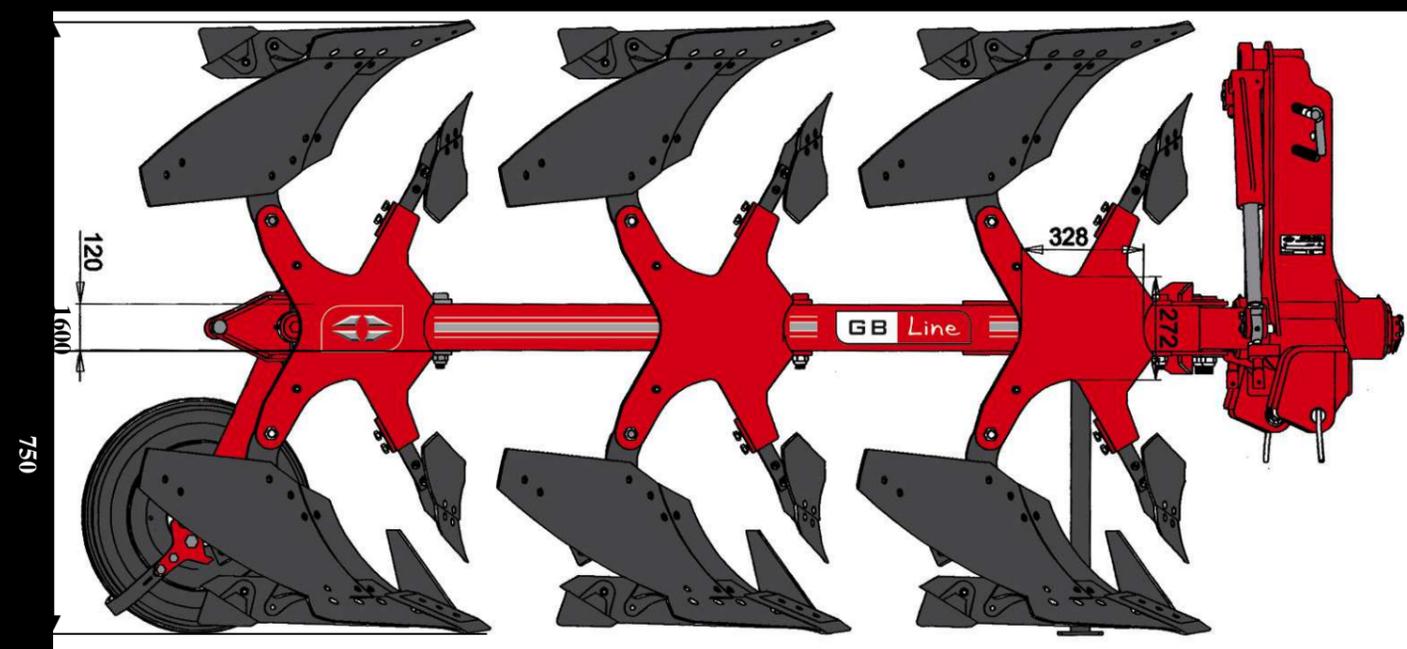

Even if our target is to offer a very attractive price level, we are offering all the adjustments required for a plough. The Prima range can suit all type of tractors from 70 to 120 hp.

- Fixed hitch cat II.
- Adjustment of the first furrow .
- Adjustment of the alignment.
- New generation top link support.

TECHNICAL FEATURES

Prima

	920	1 070
	75	100

Shearbolt

The body is made in one piece. One shearbolt ensures its safety. In the event of shocks, it is sheared, making it possible for the body to pass over the obstacle, without any risk for the plough and the tractor.
